QUALITY ENGINEERING
FOR THE DIGITAL VENTURES

Poor-performing applications can guide end-user disappointment and increased business risks. Complicated business processes, expanding quality standards and a strong need to attain cost effectiveness generates strong demand for high quality testing services.

Tech Anand Rathi as a Fintech Leader possesses a mature testing service practice. Through the separation of testing to independent test teams, Tech Anand Rathi ensures business success by imparting an individualistic and unbiased view of the quality of the application under test. Teams hold expertise in all test management tools by using reusable automation frameworks and solutions.

DID YOU KNOW?

➤ **80% of organisations use Agile Testing Model**
